This application has been transferred to Art Unit 1616 to a different examiner for further prosecution. The office action mailed 7/5/06 is vacated in light of the restriction requirement set-forth below.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1-6,15,16, drawn to an oil suspension concentrate, classified in class 504, subclass 333.
- II. Claim 7, drawn to a method of preparing an oil suspension concentrate, classified in class 504, subclass 333.
- III. Claims 8-14, drawn to a method of controlling harmful plants using an oil suspension concentrate, classified in class 504, subclass 333.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process claimed can be used to make oil suspension concentrate comprising herbicides other than sulfonamides.

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product. See MPEP § 806.05(h). In the instant case the process for using the

Application/Control Number: 10/734,828

Art Unit: 1616

sulfonamide concentrate can be used with herbicides other than sulfonamide herbicides.

Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions have different modes of operation.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

It is also requested that the Applicants elect a single specifically defined composition for the elected invention which includes specifically naming or completely defining sulfonamide compound(s), specifically naming or completely defining safener(s), specifically naming or completely defining organic solvent(s), and specifically naming or completely defining sulfosuccinate compound(s). In addition, if applicant desires additional ingredients (usually listed in "further comprising" claims), it is being requested that applicants specifically name or completely define all desired additional ingredients. Claims listing additional ingredients which are not specifically named or completely defined will be considered non-elected.

A telephone call was made to Attorney Hohenschutz on 1/8/07 to request an oral election to the above restriction requirement, but did not result in an election being made.

Application/Control Number: 10/734,828

Art Unit: 1616

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103 (a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Art Unit: 1616

## Telephonic Inquiry

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alton N. Pryor whose telephone number is 571-272-0621. The examiner can normally be reached on 8:00 a.m. - 4:30 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Johann Richter can be reached on 571-272-0646. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
